DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 28-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Campana, Jr. (U.S. Patent No. 6,272,190).

Referring to claim 28, Campana, Jr. discloses a method of decoding (decoding, col. 1 lines 41-52), comprising:
receiving (received, col. 17 lines 50-55) a plurality of packets (packets, col. 17 lines 50-55) encoding (encoding, col. 1 lines 41-52) a data file;

Art Unit: 2664,

setting up, in a memory (memory, col. 69 lines 57-67), a set of equations (equation, col. 46 lines 30-55) whose solution represents the data (data, col. 69 lines 57-67) file, based on a content of said packets; and

solving only some (intermediate, col. 69 lines 57-67) of said equations (equation, col. 46 lines 30-55) before receiving sufficient packets for setting up all the equations (equation, col. 46 lines 30-55) required to determine said data file, to reconstruct (reconstructed, col. 69 lines 57-67) a portion of said data file.

Referring to claim 29, Campana, Jr. discloses a method according to claim 28, comprising displaying at least part of said reconstructed (reconstructed, col. 69 lines 57-67) portion, prior to receiving said sufficient packets.

Referring to claim 30, Campana, Jr. discloses a method according to claim 28, comprising storing at least part of said reconstructed (reconstructed, col. 69 lines 57-67) portions in the place of said solved equations (equation, col. 46 lines 30-55).

Referring to claim 31, Campana, Jr. discloses a method according to claim 28, wherein each (entire, col. 18 lines 10-16) of said packet is not limited to include contributions from only part of said data file.

Referring to claim 32, Campana, Jr. discloses a method according to claim 28 comprising attempting to solve said equations (equation, col. 46 lines 30-55) to determine if at least some of said equations (equation, col. 46 lines 30-55) can be solved.

Referring to claim 33, Campana, Jr. discloses a method according to claim 28, comprising attempting to solve said equations only after a certain percentage (% of Fig. 5 and respective portions of the spec.) of said sufficient packets are received.

Referring to claim 34, Campana, Jr. discloses a method according to claim 28, comprising utilizing equations (equation, col. 46 lines 30-55) defined between groups (groups, col. 4 lines 30-55, col. 29 lines 45-50, col. 31 lines 5-15, Fig. 17, Fig. 8, Fig. 7A, Fig. 7B and respective portions of the spec.) of packets for said solving.

Allowable Subject Matter

3. Claims 1-27 and 35-46 are allowed.
